“SYMPTOMS AND SIGNS - PATHWAY TO DIAGNOSIS”

Zagreb
Hotel Antunović
5. March - 9. March 2025.

Under the high patronage of the President of the Republic of Croatia,
Ministry of Science, Education and Youth, Ministry of Health, City of Zagreb

WELCOME WORD

Ladies and Gentlemen, Esteemed Colleagues

It is with great honor and pleasure that we convene this Congress dedicated to the ongoing medical education of family medicine physicians. We firmly believe that, like its predecessors, this Congress will significantly contribute to the enhancement of the knowledge and competencies of all participants.

As a fitting introduction to our Congress, the EUOPREVa Forum (European Network on Prevention and Health Promotion in Family Medicine and General Practice - European Organization for Prevention and Health Promotion in Family/General Medicine) will be held from March 5th to 6th, 2025. The theme of the Forum is "Implementing Evidence-Based Prevention in General Practice – What to Prevent When Preventing," a topic of which we are particularly proud.

The Congress theme is "Symptoms and Signs - the pathway to diagnosis." We consider this title to be interesting, attractive, and broad enough to allow us to cover topics that are useful in patient care despite time constraints and unnecessary administrative burdens.

For the second consecutive year, we continue our successful collaboration with our hospital colleagues. This year, within the Congress, we have a separate session with endocrinologist colleagues. During this session, we will address the most common endocrine disorders, recent guidelines related to these disorders, and discuss in a friendly atmosphere the common problems we face, all with the aim of improving patient treatment outcomes.

As always, we can expect interesting lectures, panel discussions, debates, workshops, sections for young scientists and researchers, case presentations, open topics, a rich poster section, and the announcement of the most successful presentations with generous awards.

Join us at the Congress and let us demonstrate unity in the continuous struggle for the profession.

On behalf of DNOOM

Assoc. Prof. Dr. Jasna Vučak, President of DNOOM

GUIDE FOR LECTURERS

The Lecturer Service Center is located in the Vip A Salon Hall in what we hope will be a pleasant and relaxed atmosphere, every day during the congress from 9 a.m. to 5 p.m. Please submit your lectures by 03.03.2025 at <https://kongres2025.dnoom.hr/prezentacije/>. You will be able to check your lecture at the congress and please submit it to the professional staff. This will personally confirm your presentation. There will be a demo computer in the service center so that lecturers can try out the use of the remote control. Technical staff will be available for all technical questions. Please stick to the time frame (the clock will count down the minutes in the upper right quadrant of the monitor or on a separate screen in front of you). At the last minute, the working presidency will warn you to present your conclusion. Due to the extensive program, exceeding the allotted time will not be possible.

Declaration of interest

The existence of a possible conflict of interest does not necessarily mean an error. However, it is DNOOM's ethical obligation to inform participants so that certain relationships do not cause a possible unintentional error. Therefore, the Scientific Committee will announce a possible conflict of interest for lecturers, chairmen of the working presidency and poster presenters on behalf of DNOOM. All of them are asked to submit a declaration of conflict of interest to the DNOOM Congress Scientific Committee.

Declaration of permission to record.

All lecturers will receive a consent form from the technical organizer for recording their lecture and posting it on the DNOOM website. You can withdraw your consent at any time.

GUIDE FOR PARTICIPANTS

Program changes

DNOOM cannot assume responsibility for program changes that may occur due to external or unforeseen circumstances.

Accreditation

Participants are asked to carry their authorizations at all times during the congress. The colors have the following meaning:

-  Lecturers
-  Participants
-  Exhibitors
-  Congress staff
-  Guests

Working with young researchers/teachers in family medicine

The section on working with young researchers/scientists is designed to improve presentation and presentation skills within the allotted time and to achieve the best possible presentation with clear messages to the audience. This part of the program is dedicated to the work of young teachers on building and improving presentation skills for transferring knowledge, and is based on personal work with mentor support.

Case presentations

Thursday afternoon is dedicated to case presentations. We believe that the case presentation section has developed into a very popular gathering place for family medicine physicians and specialist clinicians. This part of the program has become a place for discussion and debate about how to handle individual cases, regardless of whether the case is very rare or an everyday problem. Specialist clinicians and family medicine specialists will also participate in the debate interactively with the participants. This time, a specialist cardiologist will be with us.

Free topics

The free topics section becomes more interesting every year. Anyone who wants to share their experiences can find their place – either through the presentation of their own research, review papers or topics of interest to colleagues. The section is richer in participants every year and has established itself as a place where colleagues are happy to participate.

Poster section

The poster section has a format – “one slide, 5 minutes of presentation”. Poster summaries will be published in the Book of Congress Abstracts.

In order to further popularize active participation, we have prepared a rich prize fund. In all of the above sections, a committee will select the first three best papers, the ceremony of which will be organized on Saturday, March 8, 2025, at 8 p.m.

PUBLIC TRANSPORTATION IN THE CITY OF ZAGREB

For those using public transport: the hotel can be reached by trams no. 5 and no. 17 in the direction of Prečko. You need to get off at the penultimate stop before the roundabout (the station is called 'Slavonskoga'). After that, you should continue on foot north to Slavonska Avenue, at the intersection where Hotel Antunović is located.

There is also a direct bus line to Hotel Antunović. The bus leaves from Ljubljana, line no. 115, in the direction of Špansko, and stops in front of the hotel. Trams no. 3, 9 and 12 run to Ljubljana from the city center.
